

# Java Assignment 1

---

Take this chance to introduce yourself. Utilize the screenshot provided as a reference, and craft a brief essay detailing your background. Share a concise description about yourself, including the school you graduated from and the year. Explain your decision to enroll at MDI, and what drives you. Lastly, outline your ultimate objective and the steps you intend to take to achieve it.

Begin by crafting your essay. Then, generate print statements to showcase in the console. Each statement should be 20 to 21 words in length. Your task should involve multiple print statements rather than just one.

## Improve your writing:

Once you've completed your essay, copy it. Then, head to [Grammarly](#), a free online grammar checker that will assist you in identifying and correcting any grammatical errors and ensuring your essay is properly structured.

## Submission:

After completing your assignment, use `Ctrl+A` in your IDE (IntelliJ) to select all your code. Then, open a Word document, create a new blank document, and paste the code. Finally, create a cover letter with your full name, student number, and email address.

## Sample Essay:

Please refrain from copying and pasting my words, as doing so may result in penalties.

```
My name is Ahmed Dicko, and I hail from Jam City. I am 18 years old, single, and content with life. I graduated from Jamisa Senior Secondary School, Brikama, in 2022, with a focus on Commerce. However, I have chosen to pursue my passion for Computer Science. I enrolled in MDI's National Diploma in Computer Science in January 2022, marking the beginning of my journey in this field.
```

```
My aspiration is to become a Software Engineer, and I aim to work for esteemed tech companies and organizations like Qcell, GRA, Assu Tech, and NAWEC. I am a self-driven individual and prefer to learn through YouTube tutorials, coding independently, and reading books, articles, and blog posts. I code daily to refine my skills and become proficient in my craft. Software development is vast, and I believe that learning these technologies and languages cannot be solely achieved through formal education.
```

```
I am committed to being cooperative and will dedicate ample time to my studies. This includes completing assignments on time, attending classes punctually, engaging in self-learning, sharing knowledge with peers, and seeking assistance when needed.
```

```
Thank you for your attention.  
Yours sincerely,  
Ahmed Dicko
```

Happy code!
