

Java1 Final Project1

project name: Grading System

Requirement Analysis

- This project should allow user to enter a subject name and a mark for five students. Use `JOptionPane` to take inputs from the user
- As you taking the information from the user you can tell the user how many student has been processed and how many are remaining.
- After entering all the subjects and their marks your project look like the demo below in the console:

The condition should check if subject mark is more than 49 `pass` otherwise `fail`

subject	mark	condition
java1	75	pass
pld	45	fail
web1	85	pass
datase1	35	fail
networking1	90	pass

Maximum mark: 90
Minimum mark: 35
Average mark: 258
Total mark: 330

Happy coding!
