Java

Assignment4 Part1

If Else Statement

In these assignment you have to take two number from your keyboard, and determine whether they are equal or which one is greater than the other.

1. Create a new folder in your assignment folder called assignment4, and open it IntelliJ
2. Create a class called MaximumAndMinimum , create a main method and print a text to the console to test your Java App.
3. Create a new object of Scanner; `Scanner input = new Scanner(System.in);`.
4. Prompt user to enter a value
5. Initialize a variable `int value1 =  input.nextInt();` to store user input
6. Repeat number 4 and number 5 respectively to store your second value.
7. Using a nested if and else statement first check whether your first value is the greatest and print a suitable message.
8. check whether your second value is the greatest, and print a suitable message.
9. Your default show be when are equal. Print a suitable message.

Have cracking!
