Java1 Lab2

Write what the following expressions evaluate to:

- `4 > 5 || 0 == 0`

- `!(20 <= 19 && 80 == 80)`

- `20 >= 20`

-
```java
int sum 10;
sum++;
System.out.println(sum);
sum--;
System.out.println(sum);
```

-
```java
String str1 = "Man", str2 = "MAN";
if(str1.equals(str2)){
    System.out.println("Two string are the same");
} else {
        System.out.println("Two string are not the same");
}
```

-
```java
if(true){
    System.out.println("Java girl!")
}
```

-
```java
String value = "D";
 switch(value){
    case "c":
        System.out.println("buy credit");
            break;
    case "b":
        System.out.println("buy megabytes");
        break;
    default:
        System.out.println("no thanks");
    }
```
